Be still! Little Seed, be still!
A January thaw doesn't mean it is spring,
'Twill be many a day 'til Robins will sing.
Be still! Little Seed, be still!

Don't stir! Apple Blooms, don't stir!
Keep your brown coats tight folded around,
Don't let the sun fool you, there's frost in the ground.
Don't stir! Apple Blooms, don't stir!

Don't peep! Little Plants, don't peep!
There's a grizzly old Frost King, to pinch your pink nose
He'll reach down and grab hold of your dear little toes,
Don't peep! Little Plants, don't peep!

Be still! Oh, Myself, be still!
Be contented to wait 'til Spring frees the streams,
Stay indoors and be gay in your garden of dreams,
Be still, Oh, Myself, be still!

—Flora Baldwin.
THE REGALE LILY
Greetings

A new year is already launched and going strong. Days are lengthening. Winds are strengthening. Warm days bring hints of color on tree and shrub. Somebody reported the other day a robin singing "Get busy, Get busy, It's almost spring."

We know that you all, along with us, are searching through enticing pages for new flower children, then pulling up short to peer into a thin purse! With this brotherly bond of necessary economics we have cut many of our prices, would have cut more had there been decreased postage rates.

To our old friends who remained faithful through last year's vicissitudes, we extend our warmest thanks. To these and to new friends we promise faithful service and honest dealing.

TERMS

Cash with order. 25 per cent on order will hold for spring delivery.

All retail orders amounting to $1.00 or more will be sent postpaid, unless otherwise noted. For smaller orders, add 10 cents extra for postage.

GUARANTEE

We raise our own stock of bulbs and plants, and use every care personally supervising all work. We promise you at all times entire satisfaction. We do our very best to avoid errors but we are just folks like the rest of you and we do sometimes make mistakes. When we do and you find it out first please tell us—not your neighbors.

SHIPMENT

We begin making shipments as soon after March 1st as weather conditions permit.

LOCATION

Our gardens are located one-fourth mile northeast of Keswick. You are cordially invited to visit us.

THE WOODLAND GARDENS
FLORA BALDWIN—NORAH BALDWIN
Keswick, Keokuk County, Iowa
Gladiolus

Introductions of The Woodland Gardens

The past three years have been unfavorable ones for us in testing seedlings: the first two because of extreme drouth, the last because illness and loss in the family left us without heart for the work. The single one which we offer is a lovely novelty.

Few of our seedlings have been shown but when they have, appreciation and awards have been plentiful.

Visitors to the gardens turn from the standard, named varieties, (of which you will note in the pages following, we have an estimable assortment), to the seedling section, exclaiming, "Oh, I want this, I want that!" Here are some of the "this" and "that" so much desired.

We are reducing prices on gladiolus markedly this year, so that in this time of financial stress, our friends may still be able to enjoy them.

In many varieties, especially our seedlings, our stock is small. Order early to avoid disappointment.

We do not substitute varieties, but unless requested otherwise may, when necessary, substitute equivalent value in a different size.

The following seedlings are offered in large size only.

1933—Introducing

THE PAINTED LADY

Before we begin this description we may as well say it is inaccurate! Its colors are so varied, so many, and so skillfully applied, as to be undescribable. Body color begonia-rose, heavily splashed with shades of violet. Throat creamy, speckled carmine. Bloom rather pointed, large and very showy. Very early. Priced to match the times...

1—50c

Woodland Gardens:

We received bulbs Saturday night. Are well pleased with them and many thanks for the extra ones. We certainly hope that we can visit you again this summer sometime as you have so many pretty glads.—W. K., Route 3, Sigourney, Iowa.
KESTICK, IOWA

EARLIER INTRODUCTIONS

BETTIE LOU (1931)—Very tall spike with many medium sized blooms of heavy substance. Placement exceptionally fine. Coloring so blended in shades of Oxblood red, nople red and carmine that it is difficult to describe. Lip lemon, thickly sprinkled with carmine. A most charming, bright bloom. 1—25c

BITTERSWEET (1928)—Silver medal for best seedling at Mid-West Gladiolus Show. This seedling was one of the most outstanding of the Mid-West Gladiolus Show 1927. Although not by any means in its best form, it attracted much comment for its great length of spike, symmetry of placement, and beauty of flower in form and color. It has the ability to hold on a long spike of bloom over a longer period than any glad we have ever handled. It is not uncommon for it, in the show room, to hold a spike of bloom a foot or more long, for four or five days. We believe it has a great future as a commercial glad because of its great endurance. Color of bloom true Bittersweet orange, slightly splashed dull violet. Blooms of medium size but beautifully formed. Plant very strong and sturdy. Sometimes over 5 ft. tall. 2—20c

CHLOE (1930)—Good sized, pointed blooms of Eugenie red, overlaid Indian Lake. 4 to 5 open on a tall spike. Odd. 1—10c

CUNICKUNDA (1931)—5 1/2 to 6 inch blooms of Geranium pink splashed with Dahlia carmine. Light splash of ruby on lip. Five open. Fine. 1—25c

DEBUTANTE (1931)—Lively, fresh shade of geranium pink, upper petals shading to white at center. Lower petals blotched vivid scarlet in throat. Most beautiful in general effect as the flower has the appearance of being lined with scarlet. Petals beautifully waved and curled. Blossoms always perfectly placed on a good spike. Texture very firm. Many visitors last summer proclaimed Debutante the most beautiful glad in the garden. 1—50c

DOVE OF PEACE (1929)—Cream white. Petals very heavy and waxy. The stamens also are cream so that the appearance of the flower is that of great purity. A minute stain of crimson often appears on a wing, giving it its name. For what Dove of Peace has ever carried its garments unstained through life? This is a most excellent variety for florists. 1—10c

EVELYN HUMMER (1931)—Extra long spike of soft rose-red. Lighter at center of flower. Lightly etched splotch of deeper color with background of pale lemon on lower petals. 6 to 8 blooms wide open at one time. Somewhat ruffled. 1—10c

HOPE (1930)—Light Spectrum red, splashed Dahpne pink. Striking throat blotch. The outer half being pale yellow, the inner half deep ruby. Entire blotch surrounded by purple. Don't sound good, but is. Bloom large, well formed. 1—10c

JENNIE HUMMER (1931)—La France pink splashed lightly with mauve. Scarlet blotch on lip and often on all the petals. Very dainty coloring. Good size and substance. Plenty open. 1—10c

One dozen Bulbs of the same variety at the price of ten

NO 20 SEEDLING (1928)—A large lavender that is much like Louise in growth and form of flower but more nearly self color, and having very slight markings on lower petals. General tone has more blue in it than Louise. It is somewhat earlier and a better spike, without the clubbiness of Louise. 1—20c

OLD SILVER TIP (1932)—Tall growing, with good sized blooms well placed on a good spike. Color deep, velvety red, splashed at the edges and tipped with silver. Very handsome and unusual. 1—25c

THE SUNBONNET LADY (1930)—Argyle purple, stippled deep Hellibore red, splashed nople red. Lip Carmine. Large blooms well placed on a tall spike. Quaint. 1—25c

TRULA (1928)—Warm, creamy buff, deeper in tone on lower petals. Has a transparent delicacy of coloring seldom found in gladiolus. Good sized, beautifully formed blooms well placed on a good straight spike. A customer who has grown it, says "I just sit and admire and absorb it." Very lovely in baskets and vases. Coloring without duplicate. 1—15c

WINONA (1931)—Very early. Blooms pale mallow pink, deeper at the edges and sometimes slightly splashed mallow purple. Tall full spike of very large blossoms. Many open. 1—20c

YELLOW BUTTERFLY (1928)—Prim hybrid. Won over all named and unnamed Prims in the 1927 Mid-West show. Extremely early. The brightest yellow glad we have ever seen. Blooms gaily winged and curled, slightly hooded. Large prim size. It unfailingly attracts the eye across an entire field of bloom. 2—10c

ZILPHY (1930)—A fat prim that isn't a prim. Blooms have beautifully rounded petals of great substance, slightly hooded, and are always placed just right. Eight open on a long spike. Color scarlet with creamy band down center of each petal. The three lower petals are blotched Naples yellow, lightly etched at base with ruby. Very bright and showy. 2—10c

SEEDLING COLLECTION—One each of all seedlings listed—$2.50

Dear Miss Baldwin:

Just a few lines to tell you that I was more than pleased with the bulbs received from you last year. I cannot buy many this year as the depression strikes us, too, as it does everyone else, but I just must have a few more of your beauties. I think your Coryphee and Aida are the most beautiful Glads I ever saw anywhere. When Coryphee bloomed I said it was perfect and there just could not be anything more beautiful and then when Aida came I decided that there was another at least as good. And Paul Pfitzer was another beauty. Well, they were all very fine and I was more than pleased with every one. And so when your catalog came this year, I just could not resist the temptation to have just a few more.—Mrs. J. D. S., Farmington, Iowa.
Gladiolus—General List

Bulbs listed below are in size 1 inch or over. In many varieties double the number in smaller, blooming sizes may be had at same price, upon request.

Bulblets a matter of correspondence.

AIDA (Pfitzer)—Dark violet blue. Small red blotch on lower petals. Spike tall and symmetrical. Very early and choice. 2—25c

AVE MARIA (Pf.)—Large light blue with slight markings. Blooms well placed and many on a tall spike. We think it the “best blue” to date. 2—25c

BETTIE NUTHALL (SA)—Coral pink with light yellow throat. Sometimes listed as an orange. Very tall spikes and large blooms. 3—25c

CARUSO (Pf.)—Very early red. Large bloom on a very good spike. Imported variety. Especially good for forcing. 2—10c

CORYPHEE (Pf.)—Exquisite soft pink. Probably the most desirable shade of pink on the market. 2—25c

DR. F. E. BENNETT (D)—“House afire red.” Known as best red. 2—10c

ELAILA (Bill)—Very strong fine white. Lilac veining. 2—10c

ELIZABETH TABOR (Hinkle)—Extra early, light rose pink, blotched scarlet. Small blooming size. 2—10c

FERN KYLE—Large, ruffled, creamy flower. Very beautiful. Full spikes. 2—10c

GOLDEN DREAM (Gr.)—A splendid new yellow that has won many honors. 2—10c

GOLD EAGLE (A)—Deep, rich yellow. One of the best yellows. 3—10c

HALLEY (Vel)—Very early pink, favorite with florists. Probably the greatest glad of commerce. 2—10c; 10—25c; 100—$2.00

JONKHEER VAN TETS (Pf.)—Pure white exhibition glad. Many large, perfectly placed blooms on tall spike. Exceptionally fine. 1—50c

JUBILEE (Kemp)—Called the greatest gladiolus of all time. Enormous flowers of light vinaceous lavender. Perfect spike and placement. 1—25c

MINUET—Tall light lavender. The most perfect in form of any lavender. 1—15c

MME. VON KONYNENBURG (Pf.)—Fine, light lavender blue. Strong grower, fine spike and bloom. A great blue. 1—10c

MOTHER MACHREE (ST)—Lavender grey with lips of petals reddish violet. 7 to 8 five-inch blooms open. A most wonderful glad. 1—25c

MR. W. H. PHIPPSS (D)—Greatest of all show glads. Whole spike open. La France pink. 1—10c

PAUL PFITZER (Pf.)—Dark iris violet. Large bloom, beautiful color, a fine glad. 2—25c

PURPLE GLORY—Ruffled, deep velvety red. 1—10c

RUFF-O-LACE (Kemp)—Ruffled and lacinated white. Largest of the lacinated type. Very fine. 2—25c

ROSE ASHE (D)—Rose and blue grey shaded. Novel. 2—10c
THE WOODLAND GARDENS

THE ORCHID (Sprague)—Pale lavender. In form and color resembles an orchid. 2—10c

VEICHENBLAU (Pf.)—Violet blue. The “always running short” gladiolus. Lovely color, good spike and large bloom. 1—10c

YELLOW PERFECTION (Pf.)—Pure soft yellow with many florets open at a time. Very desirable. 1—50c

MIXTURES

We had two mixes last year and no one will own to having done it. If they did it wouldn’t help any. We hate to own it ourselves but they are still mixed! We are going to let you have them dirt cheap. All will be blooming size, but if you will send postage we will send all large.

ANNIE LAURIE—Pink and white ruffled.

LOS ANGELES—Soft salmon pink.

GOLDEN SWALLOW—Early pointed yellow.

TYCKO ZANG—Fine, late pink.

Either mixture. 2 dozen for 25c

Gladiolus Collections

Our bulbs are clean and fine, all having been treated at planting for years. They afford a wealth of bloom at a low price.
The following collections we believe unequaled by any collections of equal price. Those who try the first collection almost invariably come back the following year for the next best, so that the “Glad” collection sells for us the next season the “Gladder” and the “Gladder” in its turn sells the “Gladdest.”

“GLAD” COLLECTION—Named varieties in a mixture of all colors. No inferior bulbs in this mixture, but bulbs that will provide fine spikes of bloom. The cheapest reliable mixture that can be bought. Per dozen 25c; 5 dozen $1.00

“GLADDER COLLECTION”—This mixture contains named varieties both plain petaled and ruffled, in a wide range of colors. These bulbs are assembled for each order so that you may count on a well balanced variety of color and form. All large sized bulbs. Per dozen 50c; 100 for $3.00

“GLADDEST COLLECTION”—Named varieties selected by us from those listed in our catalogues, each bulb labeled correctly, embracing a wide variety of colors and types. Many ruffled. You may state whether you wish light or dark colors predominating. Selected from our best. Per dozen $1.00

ALL SUMMER COLLECTION—This collection includes a great variety of colors and kinds but all good. One hundred of these bulbs will supply quantities of bloom over a period of weeks, as the bulbs are in assorted sizes from large to small, but all, even the smallest, practically certain to bloom. The small sizes bloom later in the season. If you want a variety of bloom and many surprises over a long period, this collection will please you. 100 bulbs $1.25

One dozen Bulbs of the same variety at the price of ten
Hardy Perennials

The plants offered in the following list are field grown from thrifty stock. They will reach you in good growing condition. They will be sent prepaid on orders amounting to $1.00 or more. For smaller orders allow 10c for postage and packing.

Items that are starred are suitable for rock garden.

ACHILLEA—Milfoil, Yarrow—

An ironclad perennial of very easy culture. In almost any soil it will cover itself with bloom, especially if faded blooms are shorn. The tiny flowers in white and shades of pink and lavender are closely arranged in flat corymbs. The foliage, fine cut and fern-like, is almost as attractive as the dainty blooms. A most useful border plant. 1 to 1 1/2 ft. Mixed colors only.

Each 15c; 6 for 50c

AMSONIA—

TABERNAMONTANA—A little known valuable perennial. It produces freely in May and June panicles of lovely light blue starry blooms. It is extremely hardy; happy in almost any sunny location. 2 to 3 ft.

Each 25c

ANCHUSA—Alkanet—

ITALICA DROPMORE—One of the very best perennials. Its beautiful gentian-like blue blossoms are like a cloud in the spring, and flash out again throughout the summer. Four ft.

Each 25c; 3 for 60c

MYOSOTIDIFLORA—A dwarf perennial from Russia with clusters of dainty blue flowers, resembling forget-me-nots. After the fleeces of bloom in May and June, its attractive foliage makes it still desirable through the summer.—Each 35c

ANTHEMIS—Camomile—

TINCTORIA—Very hardy plant with finely cut foliage and large, golden yellow, daisy-like blooms all summer. Fine for cutting. Any sunny location.

Each 25c

Dear Friends:

My plants came a few days ago and I was delighted with them. Many thanks for the hemerocallis you sent me as a gift. I am anxious to see the bloom. I want to order just a few more things. Please send to me at the above address.—Mrs. G. B., Des Moines, Ia.
ARTEMESIA—*Southernwoods Sage Brush*—

**LACTIFLORA**—A hardy border perennial sending out long sprays of tiny white blooms that fill the garden with perfume. Fine as a filler among other flowers in baskets and vases and in winter bouquets. Thrives best in a moist, drained place.

Each 25c

**SILVER KING**—This entire plant is silvery grey. It is like a silver mist among other flowers either used with cut flowers or in the garden. Retains form and color when dried for winter use. Likes a dry, sunny place. Each 25c

** STELLERIANA**—Foliage silvery, finely divided. Excellent for naturalizing, especially good for poor soil. 12 to 18 inches.

Each 35c

AQUILEGI A—*Columbine*

** BURBANK DOUBLE**—Plant about two feet high, literally covered with large, double blooms of dark blue, or deep purple. Either color.

Each 15c

**LONG-SPURRED**—Shades of pink and yellow mixed. 2 for 25c

**FLABELLATA NANA ALBA**—A quaint little Jap specie. Perfect foliage, bloom ivory-white.

Each 25c

BAPTISIA—*False Indigo*

** AUSTRALIS**—Tall spikes of clear blue flowers. Foliage attractive. Fine border plant.

35c

CAMPUNULA—*Bell-Flower*

**TRACHEL IUM**—(Coventry Bells)—Sturdy plants with light purple blooms that droop from a long spike most pleasingly. Prefers some shade. July and August. 2 ft.

Each 25c

CHELONE—*Turtle-head or Shell-Flower*

Hardy, herbaceous perennial of easy culture. They do well in any good garden soil but are especially contented in moist, rich soil along waterways. The flowers, on close terminal spikes, remind one of the gentians. The plant presents a dignified, unusual beauty and remains in bloom a long while. 2 to 3 ft.

LYONI—Showy, purplish red.

Each 30c

CLEMATIS—*Dwarf*

**DAVIDIANA**—Foliage bright green. Flowers bell-shaped deep lavender-blue cluster about the axis of the leaves. Odd and desirable.

Each 35c

CONVALLARIA—*The Lily of the Valley*

Is too often neglected and crowded into some sod-bound corner. It rejoices in a semi-shaded nook, free from grass and weeds, and will repay a little care with fine long spikes of fragrant bloom. Strong clumps.

Each 25c

One dozen Plants of one variety at the price of ten
CHRYSANTHEMUMS—*Hardy Garden*

The varieties listed below are the hardiest garden sorts we have so far been able to procure. We are continually revising our list reserving those best adapted to the mid-west, selecting those most hardy with frost resisting blooms and early enough to be sure of opening before too severe weather. They furnish sheaves of bloom that continue in beauty long after the first frosts. If heavy freezing weather threatens, branches of blooms or buds may be cut and kept in a cool place in water indoors for weeks. After the ground freezes, break down the tops and cover lightly with trash. An inch covering with cindery ashes helps. Give good drainage.

All are pompoms unless noted.

**ANGELO**—Large, early pink pompom, free blooming and fine.

**BOSTON**—Showy orange-brown, early pompom.

**CAPT. E. H. COOK**—Clear, deep rose color, tipped with bronze.

**CRIMSON TANGLE**—Raggedy pompom of deep, clear crimson. Resists extreme cold and needs to as it is a little later than most of those in this list. A most worthy variety.

**MURILLO**—Lovely pink pompom of exquisite formation. Early and free flowering.

**OCTOBER GOLD**—Beautiful coloring in coppery orange, changing to golden yellow with pink tones. Very free flowering and choice.

**OLD LAVENDER**—Lavender with red shadings. Quaint, large button.

**RUTH CUMMINGS**—Rich, reddish bronze, with terra-cotta tintings, opening to even soft bronze. Raggedy and petals somewhat quilled. A choice sort. Each 35c

**SNOWDROP**—The best pure white button. Mid-season. Price each unless noted 20c

**COLLECTION OF NAMED VARIETIES**

One each of the above $1.50
THE WOODLAND GARDENS

CHRYSANTHEMUMS (Continued)

UNNAMMED CHRYSANTHEMUMS

PURE WHITE—Perfectly double, raggedy, 2 to 3 inch blooms. Each 25c

BRIGHT YELLOW—Entirely double, quite regularly formed. 2 to 3 in. Each 20c

ROSY PURPLE—Semi-double, good size. Each 20c

SOFT PINK—Quite double. Each 20c

DARK RED BUTTON—Fully double. A mass of blooms about an inch across that open a deep red, changing to bronze-yellow after heavy frosts. Extremely attractive. Each 35c

BRONZE—Great sheaves of bloom in soft, even tone of light bronze. Early and very hardy pompom. Each 25c

COLLECTION—One each of above six sorts, labeled.$1.25

CHRYSANTHEMUM SPECIES—

COREANUM—(Korean Chrysanthemum.) A new perennial from Korea of unusual merit and hardiness. Stocky plants two to four feet in height are covered with white daisy-like blooms with golden centers. They often turn pink and the effect is of clouded pink and white. Uncommon and very worthwhile. Each 25c

ULIGINOSUM—(Giant Daisy.) Thrifty perennial plants covered with large, daisy-like flowers from June until September, 3 to 4 ft. Each 25c

FUNKIA—Day Lily—

Most varieties of Funkia are indifferent as to location, whether it be sun or shade. The foliage is always handsome throughout the entire season, and they remain in bloom some time. They may remain undivided much longer than most perennials. Subcordata resents too frequent division, and should have good drainage with a little shade. It is especially friendly and thrives best with southern or eastern exposure near the house.

COERULEA LANCEOLATA—Leaves rather broad, shining green. Blooms more in cluster than Lancefolia. Blue. July to August. Each 25c

LANCEFOLIA—Lilac-blue blossoms are poised along their stems like fairies in ballet dresses. A lovely flower for cutting. Blooms in profusion in August and September. Each 25c

SUBCORDATA—(Day Lily.) Shining broad leaves of bright green form a thick circle from which rise many large trusses of white buds and lily-like blooms of delicious fragrance. August, September. Each 25c

THOMAS HOOG*—Rounded leaves with white border. Blooms deep lavender. A fine border plant. Each 25c

GALEGA—Goat's Rue—

GYPSOPHILA—*Baby’s Breath*—

**BRISTOL FAIRY**—A new introduction. Its pure white blooms larger than old sorts and double, are produced in panicles. If cut it will repeat. Very fine—Each 40c

**PANICULATA**—This flower has airy, fairy white blossoms on fluffy panicles. A fine filling among other flowers for bouquets and cut flower work. Gathered when in full bloom and dried, it forms a fine misty background for winter bouquets. Large roots—Each 25c

**HEMEROCAILLIS**—*Day Lily*—

The Hemerocallis has been sold almost universally by florists as lilies. But they are not lilies. They are of much more rapid reproduction and of easier culture. The plants have slender sword-like leaves and produce great quantities of lily-like bloom during long periods of the summer. By a selection of several kinds, the blooming season may be made to extend over the entire summer. Most of them are fragrant and all are graceful and especially attractive as cut flowers. The plants are not at all particular as to location. They are good for damp spots such as edging of pools, as well as for the driest locations. The plants offered are fine specimens.

**CITRINA**—One of Farr’s new hybrids. The flowers are a beautiful light lemon color, very large, and of great substance and durability, borne on tall stems 4 to 5 ft. high. Late blooming, continuing until September. A great addition to this group of plants—Each 25c

**FLAVA**—(Yellow Day Lily.) Fragrant, lemon yellow blossoms in June and July. Two and one-half feet—Each 20c

**FULVA**—(Tawny Day Lily.) Large trumpet shaped flowers of tawny orange. These lilies when once established will bear more neglect, trampling, and blue grass than any other and still throw up fine blossom spikes. 3 feet. July—Each 25c

**KWANSO**—Large, double flowered variety, with rich, golden bronze flowers of heavy substance. Blooms over a long period, fine—Each 25c

**MIDDENDORFII**—Rich orange yellow. Delightfully fragrant. Flowers in May and June. One and one-half feet—Each 20c

One each of the above varieties, value $1.15—Price 85c

**HIERACIUM**—

**AURANTIACUM**—Dwarf plant. Deep orange blooms. Unusual and fine for rock garden—Each 25c

The Woodland Gardens:
Thank you for the generous supply of the violets. There was a lily bulb I don’t think I ordered.—Mrs. M., O. Randle Cliffs, Ind.
Iris

The "Fleur de Lis", National flower of France, has endeared itself to the hearts of people of all nationalities. Its elusive, haunting fragrance and its exquisite colorings make its blooming season a keenly anticipated pleasure that is amply fulfilled each year. Thanks to the efforts of hybridizers, its former short blooming season has been extended by selection of different kinds to many weeks. It will thrive in almost any soil, but loves best a damp location with drainage, as its roots should not stand in water.

The varieties we are offering are all of high rating and cover a wide range of colors. They may be transplanted at almost any time, except in blooming season.

The great and increasing popularity of Iris has induced us to add many new kinds to our Iris plantings. No flower is more lovely and more easy to grow.

AMBASSADEUR—A regal flower that has a great future. It is already the rival of Mother of Pearl in popularity. Both should be in every collection. Standards smoky lavender. Falls deep, velvety red-violet. Tall, well branched, blooms of heavy substance. Each 40c

CAPRICE—One of the most delightful of Iris. Its perfume, resembling crushed grapes, is quite attractive enough. But its other qualities are also endearing. Flowers are rounded and large, of rich, rosy lilac, darker in falls. Each 20c

DREAM—Standards lilac pink. F slightly darker. Orange beard. One of the finest pink Irises in cultivation, greatly in demand. Each 50c

FLAVESCENTS—Light yellow, early, very thrifty and satisfactory, an old, very well known Iris. Dozen 50c

FLORENTINA ALBA—Orris root. Lovely, delicate, pearly white, faintly tinted grey which bleaches to near pure white. Exceptionally early. It has never failed to be in bloom for Decoration Day, and its magnificent large blossoms are in great demand. Delightfully fragrant of blossom and also of root. Very strong grower. Each 10c; dozen 50c

HONORABILIS—Fine yellow with lower petals of maroon. An odd, but very pretty Iris. 2 for 25c

JUANITA—Clear blue, large fragrant flowers. Very fine. Each 25c

JUBILEE—A large ruffled flower of very heavy substance. Standards tinted with peach color, hafts and edges of falls cream-white veined and dotted bright brown. Each $1.00
LENT A. WILLIAMSON—Similar to Alcazar, but ever broader and more massive, with heavier stalks. The velvety, pansy violet falls are emphasized by the intervening bronze-gold center, and the crinkled standards of lavender violet. Each 35c

LONA—A beautiful plicata. Ground color soft yellow and white dotted and veined with various shades of amethyst purple. 30 in. Each $1.00

MAORI KING—Short and compact growth, very free bloom. Standards rich, golden yellow, closely incurved; falls velvety reddish-brown, distinctly feathered. The best of many similarly marked varieties. 3 for 25c

MRS. HORACE DARWIN—28-in. S. pure white. F. white veined lavender. One of the best whites. Each 25c

MAD. PACQUETTE—An even tone of rosy claret, probably the closest approach to red in our list. Exquisitely fragrant. Each 20c

MILDRED PRESBY (Farr)—This is unquestionably the finest Iris of the amena type, and best of the many fine productions of the late Mr. Farr. Standards white, faintly flushed pale lavender. Falls rich, dark, velvety pansy violet, with a very narrow edge of lavender white. Exceptional substance. 30-in. Each $1.00

MOTHER OF PEARL—This new Iris has a popularity never before equaled by any new Iris in the few years since it was introduced. S. and F. pale bluish lavender with creamy undertone that often assumes the luster and iridescence of the lining of sea shells. One of the finest Irises in the world. 30c

OPERA—S. red purple. F. purple violet, beard yellow. A new imported Iris, very fine. 40c

PALLIDA DALMATICA—A rare, delightful variety, especially fine for massing as well as for cutting. Tall growing; with very large full-formed flowers of soft lavender, the falls being of deeper hue. Each 20c

PLUMERI—Deep wine red. Each 15c

QUEEN OF MAY—S. lilac pink; F. lilac, blended with white; distinct, good landscape variety: a fine Iris. Each 15c

RHEIN NIXE—S. white, very large; F. rich violet purple, with distinct narrow white edge. A charming flower, beautiful in massed effects. Each 15c

BIFLORA*—Dwarf, very early. Rich purple, fine for edging. 20c

SIBERIAN—Brilliant deep blue flowers in profusion. Needs a damp place. Each 15c

VERSICOLOR—(See Wild Flowers.)

IRIS COLLECTIONS—

NO. 1—Your choice of 10c to 25c varieties. 10 for $1.00

NO. 2—Three each Flavescens, Florentine Alba, Maori King, Queen of May, one Caprice, one Plumeri. $1.00

NO. 3—One each Lent A. Williamson, Juanita, Mother of Pearl, Queen of May, Pallida Dalmatica. $1.00
Lilies

The culture of lilies, except for common varieties, has, until recently been regarded as too difficult for the general flower garden. But the advent of the robust Regale has encouraged a wider knowledge and planting of other varieties almost as easily handled as the Regale. Those in the following list are all entirely hardy. Give good drainage and follow the planting scale below. Surround your bulbs with an inch of sand and watch for moles! Ground cover and semi-shade are grateful to most lilies.

Depth of planting (measured from top of bulb surface to ground):

4 inches—Candidum, Elegans, Wallacai, Superbum, Umbellatum,
5 to 6 inches—Auratum, Longiflorum, Tigrinum,
6 to 8 inches—Regale, Speciosum.

All bulbs offered are full blooming size and so far as possible from our own gardens. But the demand for lilies is so great that our own stock is sometimes exhausted and we must supply the best obtainable in the market. Order lilies early. Late orders will be held over until fall.

One dozen Plants of one variety at the price of ten
LILIES (Continued)

AURATUM—Gold Banded Lily of Japan—This is one of the finest lilies grown. Its immense creamy blossoms spotted and studded with chocolate-crimson spots and having a broad golden band through the center of each petal are produced abundantly from July to September. Very fragrant. Each 50c

CANDIDUM—Madonna Lily—Pure white garden lily. It produces fragrant flowers in abundance in June. We supply home grown bulbs, original stock of which came from Northern France. An exceptionally fine strain of Madonnas, having large blooms with thick petals of great durability. No garden should be without at least one clump of these lilies. It is one of the earliest lilies and therefore the more prized. These lilies should be transplanted in August, but orders should be placed this spring to be sure of getting home grown bulbs, as our stock is limited and the demand is always great. Each 35c

ELEGANS—Large, brilliant orange-red blooms, produced in a loose or double whorl at the top of stem. A clump of these lilies makes a gorgeous show when it blooms in June. Very hardy. Large bulbs. Each 15c; 4 for 50c; 10 for $1.00

REGALE—A wonderful new lily from China. Grows from three to five feet in height, blooming in July. The blossoms are white with lemon yellow throat. Outside of trumpet deep rose. Extremely fragrant. As a cut flower it lasts for many days. Unsurpassed for the number and beauty of its flowers and for its thrifty growth. It is becoming so popular that it is sometimes difficult to supply enough stock. Order early. Blooming size bulbs. Each 25c

Per packet of 200 seeds, 25c. planting instructions included.

Protect Regale Lilies from spring frost.

SPECIOSUM HENRYI—A fine variety of speciosum. Very vigorous and prolific. Flower stalks 3 to 5 ft. high. Blooms deep apricot yellow, lightly spotted brown. Very fragrant. Each 50c

SPECIOSUM ALBUM—White Japan Lily. It has a greenish band running through the center of each petal. Fragrant. A very satisfactory lily. July. Each 60c

SPECIOSUM RUBRUM—Probably the most generally known of any of the Japan lilies. Rosy white, heavily spotted with crimson. When grown in partial shade it is quite pink of an exquisite shade. Fragrant. A clump of these lilies, if left undisturbed, will produce armfuls of these bright blossoms that last for weeks, and are as delightful for cutting as they are in the garden. August and September. Each 40c

SEE ILLUSTRATION ON PAGE 18
THE PINK LILY OF JAPAN, SPECIOSUM RUBRUM

SUPERBUM—Swamp or Turp’s Cap Lily—A native variety of great beauty. Brilliant orange flowers in July. Each 25c

TESTACEUM—The Nankeen Lily. One of the finest lilies that can be garden grown. Color dull apricot or rosy buff with striking orange antlers. Easily grown. 5 ft. June, July. Fragrant. Each $2.00

TIGRINUM SPLENDENS—Tiger Lily—5 feet tall. An improved strain of the dear old-fashioned Tiger Lily of our Grandmothers’ garden. Bright orange red, spotted black. Makes a magnificent show. Each Large bulbs, each 15c; 4 for 50c; 10 for $1.00

TIGRINUM, FORTUNI GIGANTEUM, FLORE PLENO—Double Tiger Lily—As hardy and floriferous as the Giant Tiger, growing about the same height. It bears an immense head of double blossoms that are handsome and unusual. Each 45c

UMBELLATUM GRANDIFLORUM—A strong blooming lily with bronzy foliage. It has a grand head of bloom in rich orange with red shadings. Of easiest culture. Each 30c
LILIES (Continued)

WALLACEI—A Japan lily that is hardy and easily grown. Color apricot, thickly spotted brown, flowers upright, very gracefully held. This lily loves moisture but must not stand in water. Each 35c; 3 for 90c

LINARIA*

HENDERSONII—Fine purple snapdragon blooms. Dainty of appearance but rugged constitution......................... 25c
VULGARIS—Butter and Eggs (See Wild Flowers). 3 for 25c

LYCIUM—Matrimony Vine—

CHINENSE—Hardy climbing vine. Each new shoot produces a cluster of purple blossoms, followed by clear scarlet fruits. These will keep for weeks indoors and outrival bittersweet in coloring..................................................... Each 25c

LYTHRUM—Purple Loosestrife—

SUPERBUM ROSEUM—Rosy purple spikes of showy blooms all summer. Very desirable.................................. Each 25c

LINUM*—Flax—

PERENNE—Lovely subject for border or rock garden. Featherly, small bushes, spangled with fresh blooms each morning—blue as azure skies................................................. Each 25c

MONARDO or BERGAMOT—Oswego Tea—

Plants with aromatic foliage, producing in profusion their bright flowers during July and August. The plants are very thrifty and do well in any soil. 2 to 3 ft.

DIDYMA, CAMBRIDGE SCARLET—Brilliant scarlet crimson. Each 25c

OENOTHERA*—Evening Primrose—

AMERICA—One of Luther Burbank’s creations and a very wonderful primrose. Very large, white blooms, each petal as large as the entire bloom of most varieties 3 for 50c
MEXICAN—A choice little primrose with good sized blooms of a lovely shade of pink 3 for 50c

PENTSTEMON—Beard Tongue—

LAEVIGATUS DIGITALIS—Loose spreading spikes of bloom with long poised flowers resembling foxgloves. White with purple markings or pinkish lavender. Fine for cutting and in the border. It needs a sunny but not too dry location. Mixed colors....................................................... Each 25c
Phlox

Phlox seems to belong with the good old fashions of curls and long skirts. In following the revival of these quaint fashions in dress, the demand for the old-fashioned flowers has so much increased that it is with difficulty that the supply is kept equal to it.

Summer drouths are hard on all perennials, particularly so on phlox, because it gives the red spider a chance to work. If the plants are given an occasional spray of sulphur or sulphur and wood ashes while dew is on or an oft repeated sousing of soapsuds, they will come through almost any drouth without serious injury. Treatment should be given at once if leaves at bottom show signs of turning yellow.

PHLOX (Continued)

THOR—A fine shade of salmon-pink, overlaid and suffused. scarlet. Each 25c

VON HINDENBURG—Brilliant crimson red or wine color with deeper eye. Makes a great color display. Each 35c

COLLECTION—One each Bachannte, Enchantress, H. Merger, Mrs. Wm. Jenkins, Siebold and Wm. Ramsey. $1.00

PHYSALIS—Chinese Lantern Plant—

FRANCHETI—(2 ft. high)—An interesting, hardy plant producing an abundance of fiery red lantern-like fruits that can be picked and kept for winter decoration. Grows rapidly in any good garden soil. When the fruit turns a bright red, cut the stem off to the ground. Hang in a cool cellar until cured. Handled in this way the leaves remain on the plant, curling until they resemble holly leaves and add greatly to the beauty of the winter bouquet. Each 20c; 3 for 50c

PHYSOSTEGIA—

One of the most beautiful of our late summer flowering plants. It grows from two to four feet high, bearing large spikes of delicate tubular flowers somewhat like a giant heather. It begins to flower in midsummer and continues until frost. It makes a great show in the garden and cuts well. Very useful on banks to stop washing. Holds its own with bluegrass.

VIRGINICA—Soft, bright pink. Lovely.

VIRGINICA VIVID—A new dwarf variety and a great improvement over other varieties. It blooms about three weeks later; flowers are larger and deeper pink, lasting long in water. Each 25c
THE WOODLAND GARDENS

HARDY PERENNIALS (Continued)

PLATYCodon—Balloon Flower—

Bellshaped, five-pointed flowers, two or more inches in diameter on long loose racemes produced constantly from July until frost. The summer garden is not overburdened with blue flowers, and this one is so vivid that it attracts much attention. The white ones resemble lilies. 2 to 3 ft.

Single, either blue or white — Each 25c
Semi-double, either blue or white — Each 35c

POPPY ORIENTALE—Oriental Poppy—

BURBANK—Oriental poppies make a gorgeous display in their blooming season, May and June, their blooms reopening each day. The Burbank strain is a highly developed strain in shades of deep crimson with black markings. Blooms immense. Orders for Oriental Poppies will be filled in late summer or early fall and they cannot be safely transplanted at other seasons—Each 35c; 3 for 85c

SALVIA—

PRATENSIS—Fuzzy-leaved perennial with long spikes of bright blue. Beginning to flower in June, it continues for a number of weeks. Very worth while. 12 to 18 inches—Each 25c

PATENS—Called the “best blue in the floral kingdom.” — Each 25c

SCLAREA—Handsome, broad-leaved plant with strong spikes of lavender bloom. Formation and coloring unusual and very eye arresting. — Each 25c

SEDUM*—Stone Crop—

An easily grown class of hardy plants which can be used to advantage in poor, sandy or rocky soil, which would be otherwise barren. The varieties listed are all upright and while they have their use in rock gardens, they are equally effective in the border. The heads of bloom are often six inches or more across and every branch carries a head of bloom. The foliage is rounded, thick and rubbery. 15 to 18 inches.

BRILLIANT—Bright, dark rose—Each 25c
SPECTABILIS—Light, rose-colored flowers—Each 25c
VARIEGATA—Blossoms pale pink. Foliage beautifully variegated green and white. Choice and rare—Each 35c

One plant of each color 75c

DWARF VARIETIES

ACRE—Golden Moss—Excellent ground cover. Green foliage. Yellow bloom. Prostrate and spreading—3 for 75c

STOLONIFERUM—Pinkish evergreen foliage. Flowers purplish pink in July and August. Always handsome. Especially fine in rock garden. 6 in. — 3 for 75c
HARDY PERENNIALS (Continued)

SHAMROCK*—

**BRONZE**—A new variety of Shamrock, having beautiful bronze foliage. The blooms, which are like white clover, should be sheered to prevent seeding. If this is done the plant retains its beauty throughout the summer. A delightful creeper and superlative ground cover—Each 35c

SPIREA—*Goat’s Beard; Meadow Sweet*—

**Palmata Elegans**—A very handsome, herbaceous perennial. Thrives best in moist rich soil. Pond of the waterside or shady border. Feathery plumes of a lovely shade of pink crown it in June. 3 ft—Each 35c

STACHYS*—

**Coccinea**—A very new border plant that is not only very lovely, but easily handled. It has a long blooming season and its spikes of small scarlet bloom instantly catch the eye. To see it is to want it—Each 35c

VERONICA—

**Spicata**—Long spikes of violet blue all summer. This is a fine variety for the hardy border. It should be cut back for continuous bloom. Easiest culture and very showy—Each 25c

**Repens**—Thick, matted, dark green foliage. Covered with bright blue 4-in. spikes in June—Each 25c

VINCA MINOR*—*Trailing Myrtle*—

Dwarf evergreen trailing plant that is fine for ground cover and carpeting shady places. Blue flower—Each 20c; 3 for 45c

VIOLA—*Tufted Pansy*—

Violas are being grown more extensively every year. Since gardeners have learned that they may be kept in almost continuous bloom by shearing the faded blossoms, they have found them delightful in many locations, especially where partial shade is not so suitable for other plants. This does not mean they will not thrive in sun, but like both violet and pansy to which they owe their parentage, they do enjoy shelter from the hottest sun.

The two varieties quoted below are both larger of bloom than older sorts.

**Cornuta**—*Apricot Queen.* Deep orange with apricot center. Very new—Each 40c

**Cornuta**—*Jersey Gem.* A production of recent years that is very popular since the price has become reasonable. Blooms persistent. Color violet blue—Each 25c
VIOLET*—

The violets that we are listing have all been naturalized to western conditions, and will thrive splendidly in any semi-shaded position. They delight in spreading out among roses or low shrubs.

Our “English Hybrid” was obtained by crossing the old English violet, which is not hardy here, with the Arkansas. Both plant and bloom are considerably larger than her English parent. Good sized, single blooms of deep, soft, violet color, exquisitely fragrant. It blooms in early spring and again in the fall. It should have a slight protection of leaves in winter, although it will often carry through with none.

“Delight” we found in a door-yard of a small city in Southern Iowa. The lady who owned the door-yard said that her husband, who had been a sailor, had found it growing wild in Argentina. We have not been able to locate it anywhere else, so we introduced it under the name of “Delight.” It calls forth more “Ohs” and “Ahs” when first met than a new baby. The color is white with bright blue centers. Sometimes the white is slightly suffused or feathered blue. But always it is lovely. The blooms are held well above the foliage and are much more showy than any other violet.

CANADENSE—This violet is found growing wild in some parts of the U. S. It is of creeping growth. Blooms light rose pink with reverse deep rose. Grown well in sun.——Each 25c

ENGLISH HYBRID—Deep purple, hardy with slight protection Stock limited.——Each 25c

DELIGHT—White and blue, absolutely hardy.——Each 25c

SYLVIA—Our first few plants of this violet came to us from a flower friend in Maryland, who said that it had been brought to her by her nature loving father as a great treasure because it was so rare. So far we have not been able to classify it, and are offering it christened in the name of the friend who gave it to us. Nothing daintier in a violet can be imagined. It is of trailing habit, and likes best a semi-shaded moist place. The wee little, cream colored blooms peep out among the tiny bright green leaves like the shy babies they are. They bloom with great freedom in the spring, and again in the fall.——Each 25c

STRAYS—Violets are about the most difficult of plants to classify, owing to their free lance habits of mixing. We have for some years greatly prized several sorts, which we have decided to share with you at your pleasure—still nameless.

NO. 1—Petunia violet in color. Very large, round bloom, fairly covering the plants, as blooms are held well above the short foliage.——Each 20c

WILD VARIETIES—(See Wild Flowers).
YUCCA FILAMENTOSO

—Adam’s Needle and Thread—

FILAMENTOSO—This is an evergreen plant, the root of which is said to be used by the Indians for soap, earning it the name of soap plant. It is very hardy and drought resistant; is attractive either alone or with other perennials. Its leaves are pointed, tipped with a flexible needle and have “threads” along the sides.

This variety throws a magnificent spike five to six feet high, bearing a pyramid of creamy, white blooms resembling lilies. These blossoms measure 1½ to 2 inches and are very durable.

Large blooming size.-----------------------------Each 25c
Wild Flowers

The conservation of the wild flowers of the United States is receiving a good deal of attention. In some states laws have been enacted for their protection. It is high time. The raids of thoughtless people have practically exterminated them in the vicinity of almost all cities and large towns. It will take more than a law or two to save them unless the people show more respect for the law than they are now doing. It will take education and training of both young and old.

If one cannot content himself with looking at wild flowers, at least he should gather sparingly, being careful not to injure the plants, nor to rob any one plant entirely. When taking up roots for transplanting to your own garden, use care to get all the root and wrap carefully in its own soil. Most wild flowers resent exposure of the root. Do not take the last plant of any variety. Leave some for self-preservation. Very few wild flowers will survive if the entire top is taken at blooming time.

We supply our plants from our own gardens. Items that are starred are suitable for rock garden.

Price on all the following list, unless noted—25c each

5 of one kind $1.00

BLUEBELL—*Mertensia Virginica—

The bluebell shows its pink buds early in spring but does not expand until the plant reaches full height, opening into panicles of drooping bells of soft baby blue. These bells are often pink at first, changing to a bright baby blue.

Each 25c; 3 for 55c

BLAZING STAR—*Kansas Gay Feather—*Liatris—

Long spikes of rosy-purple flower heads; very handsome and stately. Seems to enjoy clay banks for a home but grows beautifully in a garden. Blooms in August and September.

2 for 25c

BLOOD ROOT—*Sanguinaria Canadensis—

A native low growing perennial that flowers very early before its leaves appear. Blooms about 6 in. high, white, an inch or more in diameter. Prefers rich loam and shade or rock garden.

Each 25c; 3 for 65c
BLUE FLAG—*Versicolor*—

This is the common blue flag of our meadows and brooksides. Most at home in boggy places, but will do well in upland. Bright blue blossoms in June.

BUTTER AND EGGS*—*Linaria*—

The old-fashioned Butter and Eggs of our grandmothers' gardens. 3 for 25c

CATNIP—*Ucepeta Cataria*—

The kind the kitties like. 3 for 25c

CATTAIL—*Typhalatifola*—

3 to 6 ft. Natural habitat edges of pools and brooks. Cylindrical flower heads of dark brown are most attractive. Winter bouquets and decoration.

DUTCHMAN'S BREECHES*—*Dicentra*—

Graceful racemes of quaint white flowers of the Bleeding Heart family. The feathery foliage adds much to its charm. Shady nooks and light leaf mould give its happiest setting, but it will flourish in any light soil if the roots are protected from trampling after it dies down. 2 for 25c

HEPATICA*—

One of the earliest wild flowers. It spreads into clumps that produce a mass of dainty blossoms in various shades of blue and pink. Lovely and dainty. Mixed colors.

HONEYSUCKLE*—*Columbine*—

An early and profuse blooming wild flower that will thrive almost anywhere. Flowers 1½ to 2 inches long, red and yellow, elusive fragrance. Very graceful and attractive. 2 for 25c

JACK-IN-THE-PULPIT*—*Indian Turnip*—

Odd plants with striped green and brown blooms, shaped like a calla lily. Seeds in a large head of scarlet berries. Likes partial shade. 2 for 35c

JACOB'S LADDER, GREEK VALERIAN*—

—*Polemonium*—

Fern-like foliage with spikes of beautiful pale blue, bell-like flowers. 8 to 10 inches, April, May. Each 25c; 3 for 50c
WILD FLOWERS (Continued)

MAYAPPLE—Mandrake Peltatum—
A good plant for thick shade. Large, waxy flower, often measuring 2½ to 3 in. across, partly hidden beneath its umbrella of leaves. Its yellow fruit, about the size of a walnut, is much sought for by children—and some older folks. 3 for 25c

SWEET WILLIAM*—Phlox Divaricata Laphami—
A low growing wild phlox of beautiful gentian blue, flowering from May until July. Delicate fragrance. Lovely in mass.

SWEET FLAG or CALAMUS—Acorus—
A bog plant that will grow also in uplands. Its slender green foliage is attractive. The bloom is odd and interesting. Root used medicinally.

WILD AGERATUM—Eupatorium—
THOROUGH-WORT (Ageratoides)—A useful border plant of strong, free growth, 3 to 3½ feet, with minute white flowers in large heads that are fine for cutting in Aug. and Sept.

WILD GERANIUM—Crane’s Bill—
PINK (Maculatum)—Native of our open woods. Flowers lavender pink. One of our delightful wild flowers. May, June 2 feet. Each 25c; 3 for 50c
WHITE (Album)—A white form of the above, not quite so tall, Flowers of better substances. Each 25c; 3 for 50c
DARK BLUE (Praetens)—Large, deep blue flowers in pairs on stems. Very handsome for the border. Each 35c; 3 for 75c

WILD PHLOX—Phlox Paniculata—
Rather loose panicles of fragrant blooms, in color true phlox purple. Naturalizes beautifully among other flowers and shrubs, thriving either in sun or shade. 2½ to 3 feet.

WILD ROSE—Rosa Carolina—
The well known wild rose with its fragrant single blooms of pink. The bright red fruit remains on the bushes to attract and feed hungry winter birds.

TURK’S CAP LILY—Superbum—
A native variety of great beauty. Brilliant orange flowers in July.

VIOLETS*—
VIOLET—Common wood Violet, blue. Each 15c; doz. $1.00
YELLOW WOOD VIOLET—Trailing habit. Each 15c; doz. $1.00
WHITE WOOD VIOLET—Pure white, with slender lines of lavender on lip. Delights in a damp place and if so planted does not mind the sun. Each 15c; doz. $1.00
Hardy Flowering Shrubs

All shrubs will be sent by express or mail collect unless order is accompanied by a sufficient sum to cover these charges. No charge is made for packing and excess funds will be returned.

BUDDLEIA—Butterfly Bush—

VARIABILIS MAGNIFICA—This is in reality a shrub but in this climate freezes back each winter and comes up in spring. It is a rapid grower and is soon covered with long, drooping racemes of lilac-like sweet scented flowers. Continues in bloom all summer. 3 to 4 feet.---------2-yr. plant 40c

JUNE snberry—

JUNE snberry—10 to 12 ft. This Juneberry must not be mistaken for the dwarf sort. It is a much heavier producer than the dwarf. It is sometimes called "Highbush Huckleberry." It is covered in spring with ornamental clusters of white bloom, followed by rosy-purple fruit that completely covers the bush. The berries are quite similar to huckleberries and make most excellent pies, either canned or fresh—that is if you are lucky, for birds, children, and grown folks flock to the tree. Stock very scarce. 1 to 2 ft.---------Each 40c

HYDRANGEA—

ARBORESCENS GRANDIFLORA—Hills of Snow—This hydrangea resembles a miniature snowball bush. It is one of the most attractive hydrangeas flowering profusely from July till September. It reaches from 3 to 5 ft. in height, but may be spring pruned and kept even lower. 1½ to 3 ft.---------Each 50c

KOLKWITZIA AMABILIS—Beautybush—

A beautiful new shrub originally discovered among the high peaks of mountains in China. It has proven entirely hardy in the severe New England climate, and will make a distinct addition to our flowering shrubs. It grows to the height of 6 ft. and is covered with a mass of pink flowers in early June. Each bloom is 3-4 in. across the mouth, trumpet shape. The buds are deeper pink. Foliage lacy and sprays very flexible and graceful. Stock is limited everywhere. Order early. 1½ to 2 ft.---------Each 50c; Blooming size $2.50

LILAC—

French lilacs come to maturity and bloom very young. We have two varieties on their own roots, which we have not been able to identify. Both have fine double bloom and bloom profusely. These are blooming size.

DOUBLE WHITE-----------------------------------Each 25c
DOUBLE REDDISH PURPLE-----------------------------------Each 35c

One of each 50c
POLYGONUM—

CUSPIDATUM—An herbaceous perennial shrub. This shrub is as yet practically “undiscovered” and has found its way into very few gardens. Early shoots and leaves are red, turning to light green. Leaves broad, 4 to 5 in. in length. The long branches have both terminal and auxiliary drooping panicles of tiny, creamy blooms that veil the plant. It is a most useful as well as ornamental plant, as it follows shortly after Baby’s Breath and cuts equally as well, holding its beauty for winter bouquets. Height about 4 ft. Stock is scarce and unobtainable when our stock is exhausted. Price each $1.00

SORBARIA—False Spirea—

SORBIFOLIA—A handsome rapid-growing shrub with many arching branches. Fresh green ash-like leaves and large white panicles of feathery bloom make of it a season long object of beauty. 2 to 3 ft. Each 30c; 3 for 75c

SPIREA—

ANTHONY WATERER—A dwarf shrub of spreading type much used in foundation plantings and in low growths of shrubbery. It is covered with clusters of brilliant, rosy, crimson flowers in summer. If blooms are removed as they fade it will continue to bloom until frost. A showy plant. 18 to 24 inches. Each 60c

CALLOSA ALBA—Very similar to the above but white. Good clumps. Each 50c

PRUNIFOLIA, fl. pl.—Bridal Wreath—Plum-like foliage which turns red in autumn. Covered very early in spring with tiny, very double white blossoms. Very desirable. Height 4 to 10 ft. 2 to 3 ft. Each 50c; 3 to 4 ft. Each 75c

Salad Plants

SPINACH—

SORREL SPINACH—The earliest spring greens to be found. It begins to throw up its long pointed leaves as soon as the snow is gone and is ready for cutting long before anything else. It is fine for salads, used raw, either alone or with other greens. When the leaves begin to toughen it may be cooked and is especially good combined with other greens, its slight acid adding a piquancy nothing else supplies. It is a “cut and come again” and furnishes such a quantity of greens that it should have a place in every garden. Entirely hardy. Each 25c; dozen $2.50
Hardy Native Shrubs

Our native shrubs are being rapidly destroyed in both woods and roadsides. A little care and special planting in unused corners will not only add beauty to our homes, but help to preserve our native attractions.

Prices f. o. b. Special prices may be had on larger specimens is desired.

BLACK HAW—A tall shrub having finely toothed foliage on horizontal branches. Attractive white blooms in cluster. The fruit is oval and flattened, very sweet and flavorful. A very fine native shrub. 18 to 24 in._--------------------75c

CHOKE CHERRY—Small trees with long drooping racemes of blossoms. The fruit is somewhat puckery, but much liked by persons who enjoy woodsy fruit. It makes delicious and unusual jelly. 3 to 3 ft._----------------------Each 50c

CRAP APPLE—The beauty of the wild crab is well known to everyone in the country where they are still to be found. City dwellers may carry its exquisite fragrance and lovely coloring into their home surroundings by establishing them on their grounds, as they are of easy culture. No shrub carries such a touch of the wildwood as the wild crab. Most abundant bloom of bright pink. Fruit sour and makes wonderful jelly. 2 to 3 ft._50c

ELDER—Immense flat-topped cymes of white flowers followed in September by black fruit, the source of "Mother's Elderberry Pie." 2 to 3 ft._-------------------Each 35c

DOGWOOD—Broad spreading habit. Bright coral red branches. Creamy white flowers. Most attractive in winter as the branches remain red. 2 to 3 ft._----------------------35c

HAZEL NUT—Nuts small and easily cracked. One of the finest of native nuts. 2 to 3 ft._-----------------------------50c

PLUM—Sweet scented white bloom cover the tree in early spring and perfume the whole garden. Fruit edible. Fine for pies, preserves and jelly. 2 to 3 ft._----------------------------Each 35c

SUMAC—Our native sort grows 5 to 6 ft. Dense panicles of white bloom followed by dark red fruits. Foliage colors brilliant shades of red in fall. 2 to 3 ft._----------------------------Each 35c

I received your letter and the nice box of bulbs. My, you sent such a nice lot of them. I surely thank you for them.—Mrs. E. H., El Portal, Calif.

The plants came Saturday and were as fresh and lively looking as before they were dug. Many thanks. I don't know what the bulbs were that you sent, but they were growing right along and looked good enough to eat.—Mrs. J. H., Prairie Point, Miss.

Dear Flower Friend:

Box came today in fine shape. To say I'm delighted only tells half of it. I am just so glad for every one. I think every plant you sent me first is doing fine. Sure glad some one sent me your catalog for I've found a new flower friend that pleases me. Many thanks.—Mrs. W., Union City, Ind.
